

Generic COVID-19 Risk Assessment Template – Lambeth Council

As an employer, you must protect people from harm. This includes taking reasonable steps to protect your workers and others from Coronavirus. This is called Risk Assessment. **This document will help you to ensure a safe working environment for staff and members of the public.**

This document has been principally designed for small and medium sized businesses to guide you through the process of drawing up a Risk Assessment, as it is unlikely that you have access to a suitably competent internal Health and Safety Representative or to an external Health & Safety Consultant.

In order to ensure your business is COVID secure compliant, you must undertake the following:-

- Identify what work activity(s) or situations could result in the transmission of the virus;
- Think about who could be at risk and how;
- Determine and implement control measures to mitigate the risks from the spread and/or transmission of the virus; or seek to remove this work activity(s)/circumstance where possible to do so.
- Decide whom in the organisation/business will undertake this action, and by when.

Note: Employers with five or more employees must record electronically or in a manual document, the significant findings of their Risk Assessment. If you have fewer than five employees, you do not need to document this in writing or electronically, however we recommend you do so to facilitate ease of reference for management and staff.

For your guidance, we have started the Risk Assessment for you under the header 'What are you already doing to control the risks from Coronavirus' by including a basic profile of COVID-19 controls currently in circulation on various Government websites. You should also think about any additional persons who may be harmed that are not included in the class groups documented below in this document; and then assess how they might be harmed. Additionally, you will also need to document any further actions you intend to put into place and specify who will do this and a timescale for completion, and mark when complete.

Please note: All the control measures recorded in this template may not be relevant or practicable to your business operation or premises. You should therefore edit or remove as appropriate.

It is advisable to complete this document electronically as the information you input will be in a legible and comprehensive format. We recommend you make reference to the Health and Safety Executive webpage: Working Safely during the Coronavirus Outbreak: www.hse.gov.uk/coronavirus/working-safely/resources.htm and Guidance [HSE Working Safely During the Coronavirus Outbreak - A Short Guide](#).

You can save this template once complete so you can easily review and update the information as and when required in terms of new Government Guidance being issued; and/or from the identification of new Coronavirus work related hazards in the workplace/work environment, alongside additional control measures that may be implemented.

It is important you discuss your assessment and proposed actions with your staff or their Health & Safety Representative.

Advisory Note: You do not need to use this template for your Risk Assessment. For further information and to view examples of a range of business sectors Risk Assessments, please visit the Health and Safety Executive website at: <http://www.hse.gov.uk/risk/casestudies/>

COVID-19 RISK ASSESSMENT

Company/Business Name:
